

5 October 1978

Lyle,

This package should serve as a starter. You can see from the attached list that we have recently sent SFR other material apparently related to the visit to the USSR.

Some additional points you may wish to mention to Jones:

- The Atlas and City Guides are somewhat dated, but they do contain some good maps and they are unclassified.

- The memorandum on Brezhnev and the succession is a year old, but we believe the political dynamics it describes are essentially unchanged. The forecast would not be greatly altered today. The one major update would involve the sudden death of Party Secretary Kulakov who had been widely touted as the member of the "younger" generation most likely to get Brezhnev's job as party chief.
